KOALA Environment 2025-2027	
Product	<p>Bundle with the following journals:</p> <ul style="list-style-type: none"> • Environmental Psychology Open (EPO) • Worldwide Waste: A Journal of Interdisciplinary Studies • Global Environment: A Journal of Transdisciplinary History <p>Environmental Psychology Open (EPO) is a Diamond-OA journal that has evolved from the journal Umweltpsychologie (> 25 years, ø 15 articles p.a.) and is endorsed by the DGPs Environmental Psychology Section. EPO aims to make psychological knowledge visible and usable for sustainable improvements of the living environment – with a focus on the research fields environmental psychology and sustainability sciences as well as their areas of application. Submissions are possible in German or English (as research reports, practice reports, case studies, commentaries or registered reports) and are subject to an open peer review process. EPO deliberately has no focus on specific geographical regions. Apart from EPO, there is only one other Diamond OA journal dedicated to environmental psychology research; this journal focuses on contributions with an international orientation and publishes in English only.</p> <p>Worldwide Waste: A Journal of Interdisciplinary Studies This English-language journal applies double blind peer review to seven research articles <i>per annum</i>, and also publishes editorials. It is interdisciplinary with a focus in history and social science. Its perspective is worldwide. <i>Worldwide Waste</i> presents innovative research on waste from around the world. It provides the first scholarly platform for open-access scholarship that critically interrogates the cultural, social, economic and political systems within which waste is created, managed and circulated. Devoted to scholarship, the journal privileges no particular theories, debates or trends. Its goal is to actively stimulate publications of innovative scholarship on relatively unexplored topics and/or from geographical areas that have thus far been underrepresented in waste studies.</p> <p>Global Environment: A Journal of Transdisciplinary History This English-language journal applies double blind peer review to 15 research articles <i>per annum</i>, and publishes editorials, book reviews and notes. It is interdisciplinary with a focus in history and social science. Its perspective is worldwide with an emphasis on the Global South. <i>Global Environment</i> acts as a forum for studies on the environment and world history, with special focus on modern and contemporary topics. The journals intent is to stimulate scholarship that, despite a diversity of approaches, shares an environmental perspective on world history in its various facets, including economic development, social relations, production government, and international relations. The journal aims to facilitate a common language in the study of history by bringing together the natural and the social sciences.</p>
